Nguyen Nhat Huynh

Intern

I am a final-year student majoring in Information Technology at Dong Nai University of Technology. I have gained knowledge in areas such as Mobile App Development, Web MVC, WinForms, system design, database management, data analysis, and basic machine learning models. I am actively seeking an internship opportunity to apply my knowledge, gain hands-on experience, and further develop my technical and professional skills

- Spring Boot
- Flutter (iOS & Android)

Database:
- SQL Server , SQL Lite, MySQL MongoDB

API Development:
- Swagger, Postman

Testing:
- Unit testing

Version Control:
- Git and Github

Soft Skills

- Research and read English documents
- Ability to Self-Learn and Work in Teams.

Project

6 - 2023
Mindx Technology School | 253 Pham Van Thuan
Teacher
- Taught web development courses, Scratch, and game development.
- Mentored students in their personal development, assisting them in building strong portfolios and preparing for careers in technology.
- Certificate: "Teacher with the best student achievements"

5 - 2024
Weather App
Mobile Development
- Built a mobile app delivering accurate weather forecasts using OpenWeatherMap and Open-Meteo APIs.
- Implemented features like daily, weekly, and 3-hour forecasts with detailed weather info.
- **Technologies:** Flutter, Dart, Dio, and Riverpod for efficient state management and seamless performance.
- **Github**: https://github.com/NguyenNhatHuynh/Weather-App-RestAPI.git

8 - 2024
UniScore App
Mobile Development
- Designed and developed a mobile app for students to calculate GPA, track progress, and manage academic records.
- Key features include GPA calculation, grade history tracking, semester-wise course categorization, and light/dark mode support.
- Built with Flutter and Dart, using Provider for state management and Shared Preferences for local storage.
- Delivered a clean and intuitive user interface to enhance the user experience.
- **Github**: https://github.com/NguyenNhatHuynh/UniScore.git

10 - 2024
Finance App
Mobile Development
- Built a mobile app to manage personal finances, empowering users to track expenses and budgets effectively.
- Implemented features like expense tracking, custom budgeting, financial reports with charts, and multi-language support.
- Technologies: Flutter, Dart, SQLite, Riverpod for state management, and secure data encryption.
- GitHub: https://github.com/NguyenNhatHuynh/Finance-XD-App.git
